ONE CLICK EXPORT

for Premiere Pro

The best export tool you'll try!

BRAND NEW FEATURE
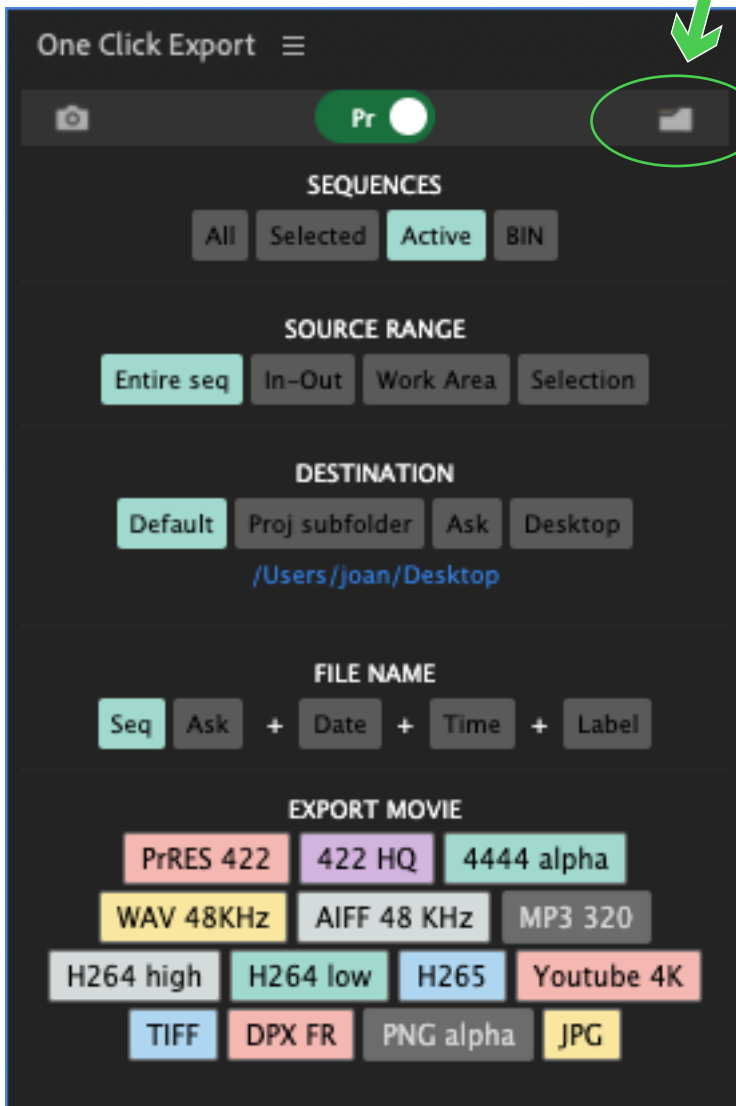

Automatically open folder

With version 1.2.4 (and above) of *One Click Export*,
it is possible to automatically open the **output folder***
when a movie render is finished.

You can **enable** or **disable** this option
with just one click on the *folder icon*.

You can also open the last output folder **at any time**.
Just hold *ALT (on Windows)*
or *OPTION (on Mac)* and click on the *folder icon*.

**Every time you export a movie or a frame, the output folder path
is automatically updated.*
