

# BeatEdit for DaVinci Resolve Installation Instructions

## Automatic Installation (Win & Mac only)

the easiest way to install BeatEdit is to use the **aescripts + aeplugins manager app** which is available at

<https://aescripts.com/learn/aescripts-aeplugins-manager-app/>

## Downloaded Resolve from Mac App Store?

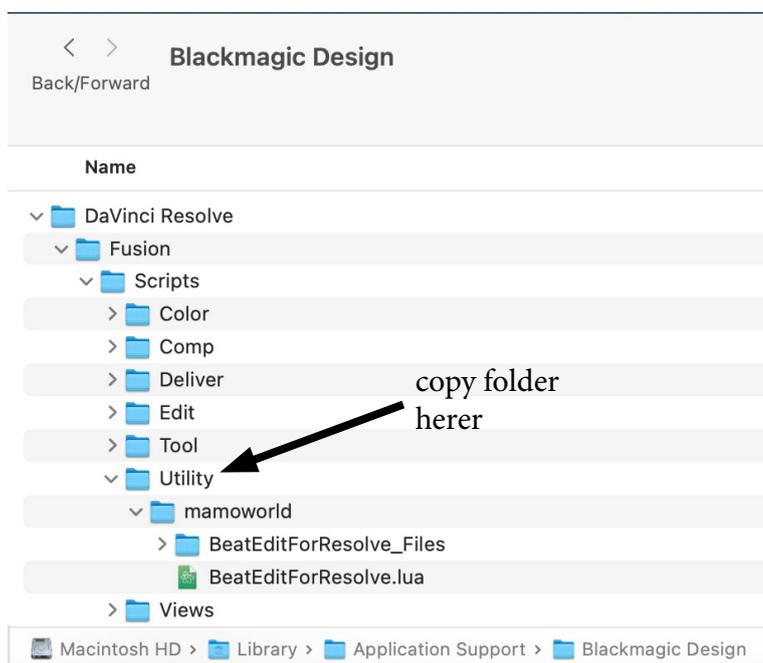

The version of Davinci Resolve which is available on the Mac App Store does not support third party tool properly. Hence, it does not support BeatEdit. Make sure to [download Resolve from Black Magic Design](#) instead of using the App Store.

## Manual Installation

BeatEdit is implemented as a utility script in Davinci Resolve. To install it, just copy the entire folder mamoworld to the following location:

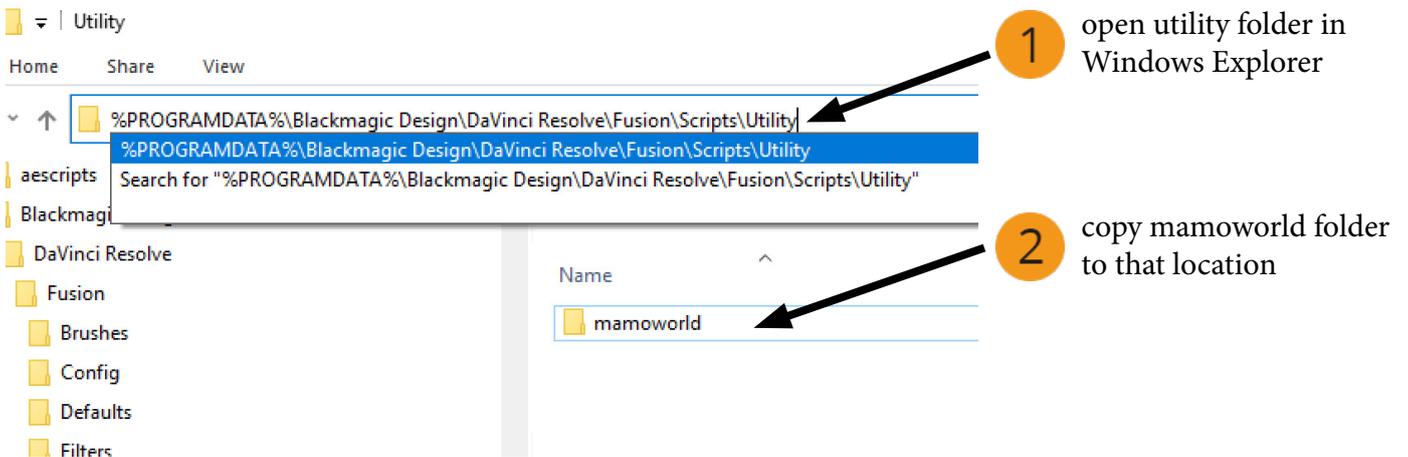

### Mac OS X

- **installation for all users**  
*/Library/Application Support/Blackmagic Design/DaVinci Resolve/Fusion/Scripts/Utility*
- **installation for specific user**  
*/Users/<UserName>/Library/Application Support/Blackmagic Design/DaVinci Resolve/Fusion/Scripts/Utility*

## Windows

- **installation for all users**  
*%PROGRAMDATA%\Blackmagic Design\DaVinci Resolve\Fusion\Scripts\Utility*
- **installation for specific user**  
*%APPDATA%\Blackmagic Design\DaVinci Resolve\Support\Fusion\Scripts\Utility*

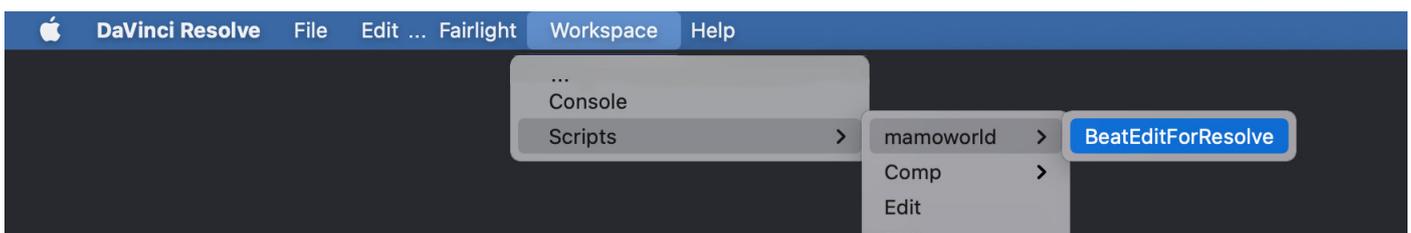

## Linux

- **installation for all users**  
*/opt/resolve/Fusion/Scripts/Utility/ (or /home/resolve/Fusion/Scripts/Utility/ depending on installation)*
- **installation for specific user**  
*~/.local/share/DaVinciResolve/Fusion/Scripts/Utility/*

## Launching Beat Edit

Congratulations! Now you find Beat Edit in DaVinci Resolve's main menu at **Workspaces->Scripts->mamoword->BeatEditForResolve**

## Issues?

If you have any issues, please [open a support ticket](#).
