

# Dresser

## Layer Styles the easy way

## Installation

1. Go To [aescripts.com/dresser](https://aescripts.com/dresser) & follow the instructions for acquiring the extension
2. Close After Effects
3. The easiest way to install and license is using the [aescripts + aeplugins manager](#), alternatively you can also install using the [ZXP installer](#)
4. **Open After Effects** & click on **Dresser** under **Window → Extensions** This will open up Dresser for you.
5. Start your Trial or enter you license key (you can also activate your copy from the [aescript + aeplugins app](#))
6. Dock your personal stylist wherever you like. I recommend not to dock it in a group with the Effect Controls. Because Effect Controls will override the view of the group when an effect is applied.

## Dresser Manual
