# Installation

The easiest way to install and license is by using the [aescripts + aeplugins manager](#)
To install a trial you can select 'Add Trial' from the 'Account' menu
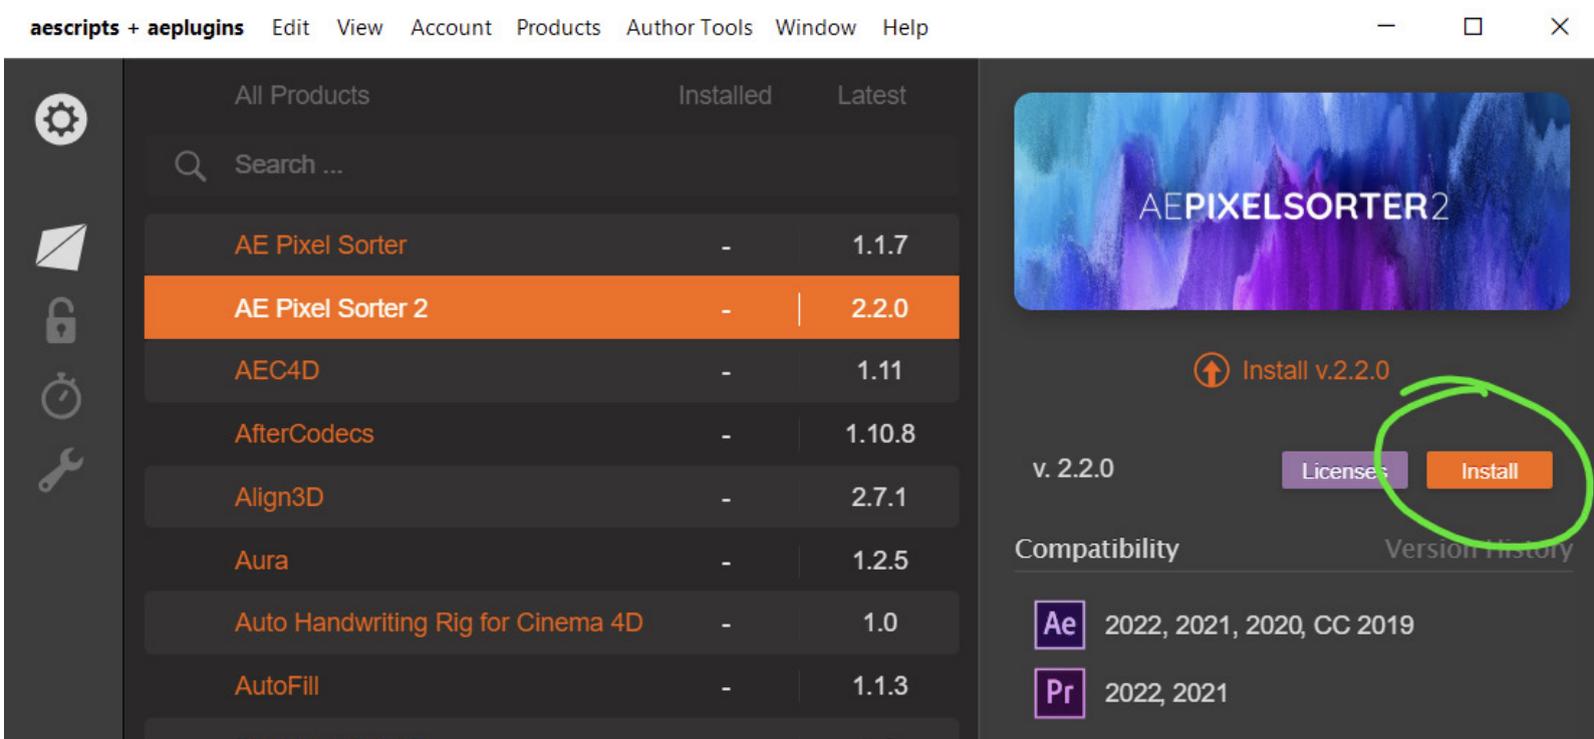

Then, in AE or Premiere, you will find the plugins in the "Gabgren 2000" category in the effects menu.

Manual Installation

If you prefer to install the plugin manually:

1. Copy the plugin file in the Adobe Plugins folder:

<u>on Windows:</u>

Copy : PixelSorter3.aex to:

`C:\Program Files\Adobe\Common\Plug-ins\7.0\MediaCore`

<u>on Mac:</u>

Copy : PixelSorter3.plugin to:

`/Library/Application Support/Adobe/Common/Plug-ins/7.0/MediaCore/`

2. This will install the plugin for both AE and Premiere. But you will not be able to register it in Premiere. You will need to open AE to register (see next page). Once it's registered in AE, you will be able to use it in Premiere.

Manual Registration

Unless you enter your serial number, Pixel Sorter 3 will run in TRIAL mode and display a red cross over the output and will be limited to a resolution of 960x540.
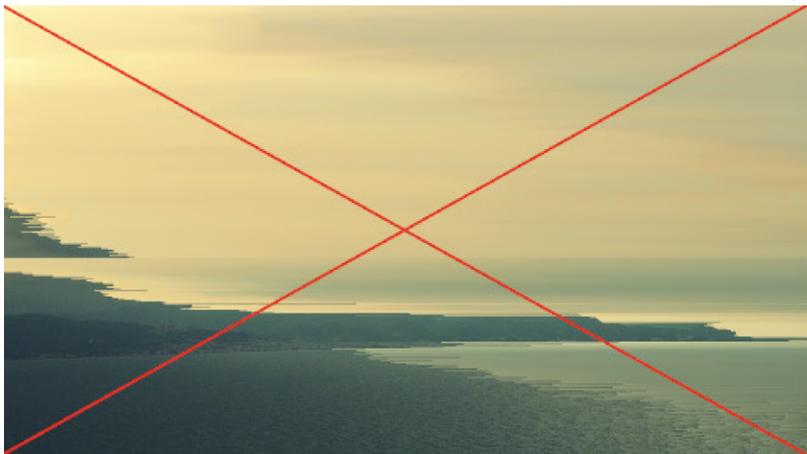

To register the plugin manually, add Pixel Sorter 3 effect to a layer in After Effects, then click the Register button on top of the plugin parameters.

You can find you license code in the 'My Downloads & Licenses' section of your user account on aescripts+aeplugins. (https://aescripts.com/downloadable/customer/products/).

* Note for Premiere Pro users: register the plugin in AE first. There is no Register button in Premiere

Post your work :)

It's always a pleasure to see what you create with the tool.

Use #aepixelsorter on Instagram to show your work and get reposted!
