

# Installation

The easiest way to install and license is by using the [aescripts + aeplugins manager](#)

To install a trial you can select 'Add Trial' from the 'Account' menu

## Manual Installation

If you prefer to install the plugin manually:

1. Copy the plugin file in the Adobe Plugins folder:

on Windows:

Copy : Glasswork.aex to:

C:\Program Files\Adobe\Common\Plug-ins\7.0\MediaCore

on Mac:

Copy : Glasswork.plugin to:

/Library/Application Support/Adobe/Common/Plug-ins/7.0/MediaCore/

2. This will install the plugin for both AE and Premiere. But you will not be able to register it in Premiere. You will need to open AE to register (see next page). Once it's registered in AE, you will be able to use it in Premiere.

## Manual Registration

To register the plugin manually, add Glasswork effect to a layer in After Effects, then click the Register button on top of the plugin parameters.

A rectangular button with the word "Register" in a blue, sans-serif font. The button has a dark background, possibly black or dark grey.

You can find your license code in the 'My Downloads & Licenses' section of your user account on [aescripts+aeplugins](#). (<https://aescripts.com/downloadable/customer/products/>).

\* Note for Premiere Pro users: register the plugin in AE first. There is no Register button in Premiere
