

Look Development Tools

ColorTwist, the ultimate DCTL bundle for filmmakers, cinematographers and colorists who want to bring the vibrant and immersive look of film to their digital footage or any kind of creative look development.

This Bundle Contains...

Nx ColorWarp
Nx Saturation
Nx Luma
Nx Density

INSTALLATION

1. Open DaVinci Resolve Studio
2. Go To File > Project Settings... > Color Management
3. Under the "Lookup Table", Click the "Open LUT Folder" Button
this will open the Finder on Mac / Explorer on Windows.
4. Copy the Folder "ColorTwist Win" or "ColorTwist Mac" (depending on your OS)
to the LUT Folder.
5. Restart DaVinci Resolve

USAGE

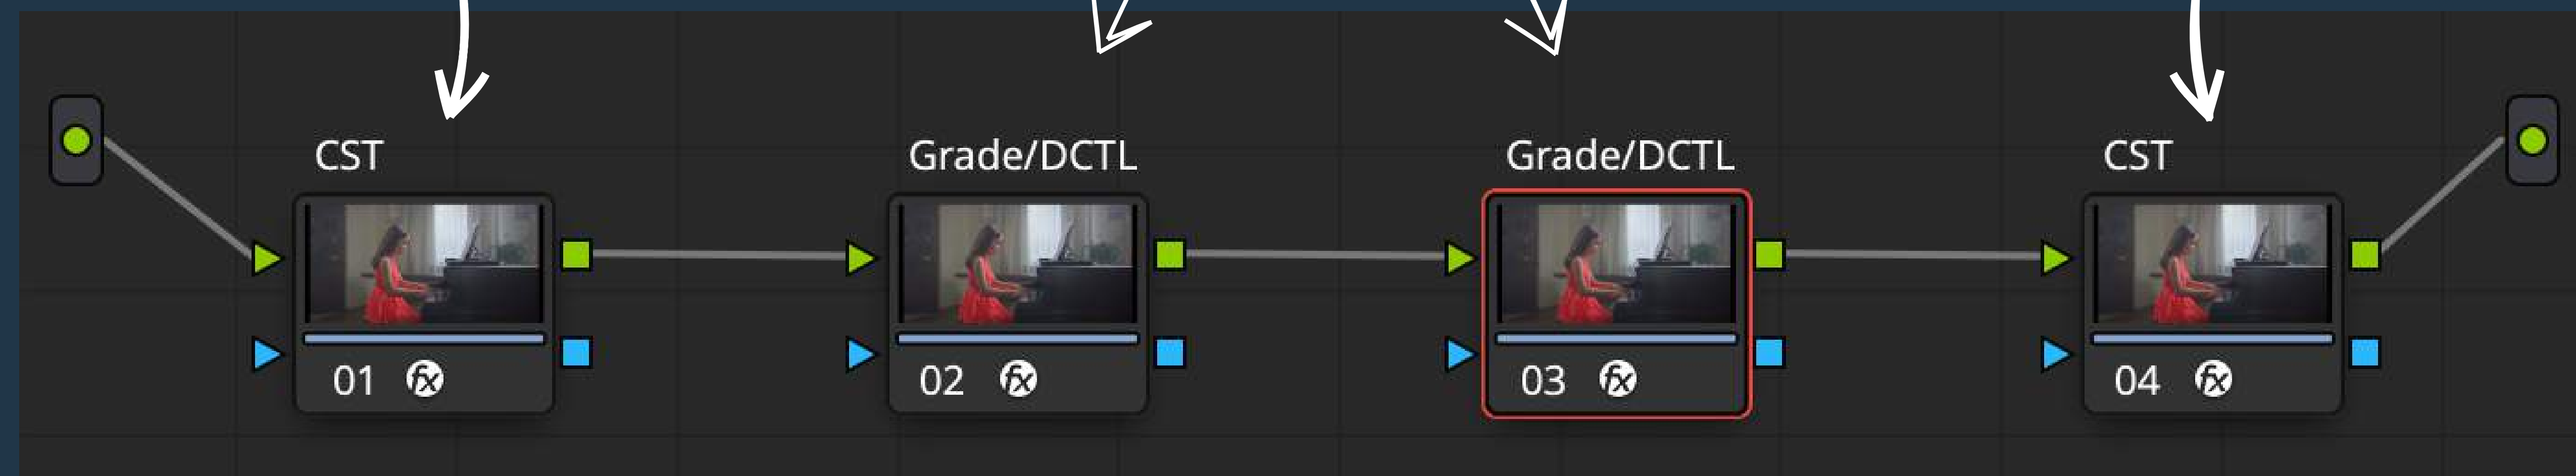

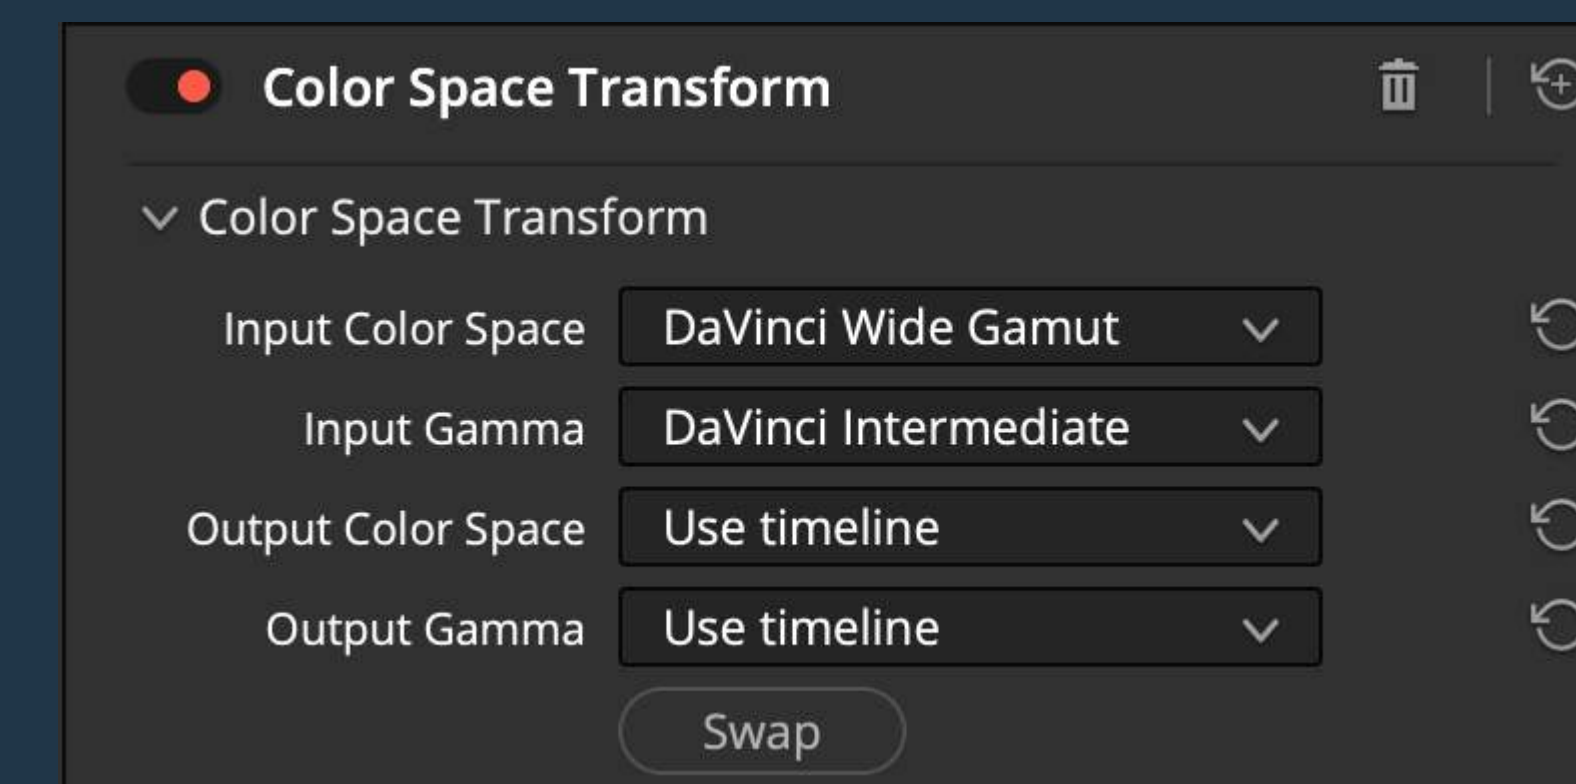

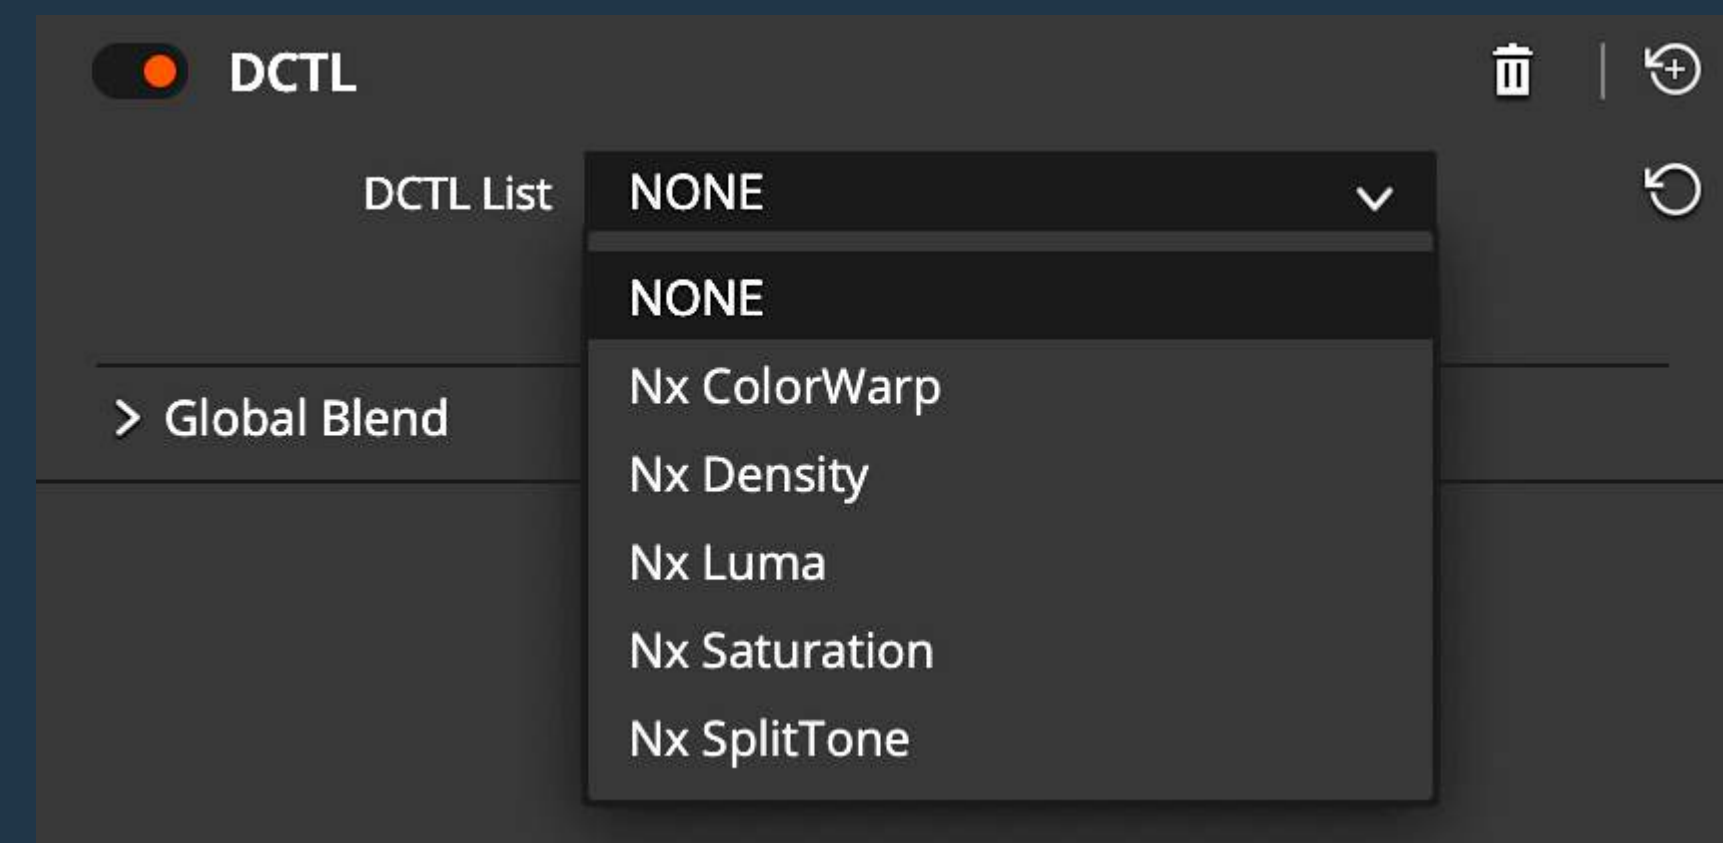

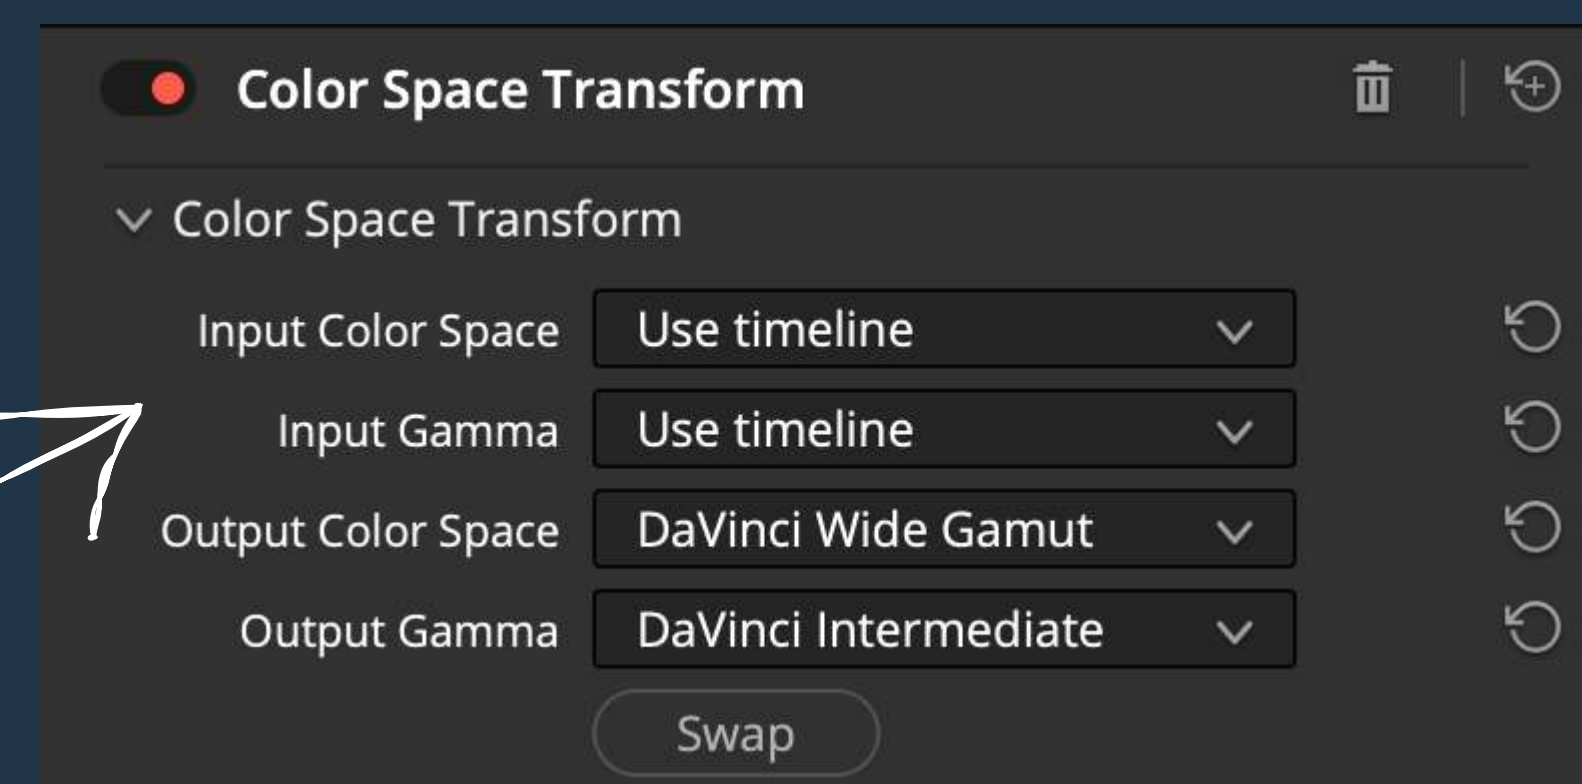

1. Open your DaVinci Resolve Project and open the Color Page.
2. On the Right Side of the program Go to Effects > Library
3. Under the "Resolve FX Color" you will find "DCTL" which can be dragged and dropped on a node, on selection of the node you will find the DCTL in the dropdown menu.
4. If you would like to add additional DCTL's to the node tree, you can create a separate node and add another DCTL.

Workflow

These DCTL's are designed to work in large color spaces like DaVinci Wide Gamut

These DCTL's work in CST based or Color Managed Workflow

Set Input Color Space and Gamma
