Installation Instructions

The easiest way to install and license Align Pro is by using the aescripts + aeplugins manager. To install a trial you can select 'Add Trial' from the 'Account' menu in the app.

You can read the full Align Pro documentation here.

Manual Installation

If you want to install Align Pro manually, here's how:

1. First, close After Effects if it's open.
2. Unzip the zip file that you've downloaded from aescripts.
3. Copy 'Align Pro.jsxbin' to your ScriptUI Panels folder. If you're not sure where this is, don't worry — here's a handy reminder:

macOS

/Applications/Adobe After Effects (version)/Scripts/ScriptUI Panels

Windows

Program Files\Adobe\Adobe After Effects (version)\Support Files\Scripts\ScriptUI Panels

And that's it! Just reopen After Effects and launch Align Pro by clicking Window > Align Pro.jsxbin

Align Pro is designed to be docked into the After Effects interface so it won't run from the File > Scripts menu.

If you have any issues with installation, please open a support ticket.
