

# OrganizerPro

The easiest way to install and license is by using the aescrpts + aeplugins manager <https://aescrpts.com/learn/aescrpts-aeplugins-manager-app/>

To install a trial you can select 'Add Trial' from the 'Account' menu

## Installation

- Download and move OrganizerPro.jsxbin into the following folder:
  - PC : C:\Program Files\Adobe\Adobe After Effects XXXX\Support Files\Scripts\ScriptUI Panels
  - Mac : /Applications/Adobe After Effects XXXX/Scripts/ScriptUI Panels
- Launch After Effects and find it under Window > OrganizerPro
- Paste the license code provided upon purchase.

## You 're all set!

## How it works

- Select the compositions you wish to organize; they will go inside the root folder called **RENDER**. Everything else will be sorted inside the **RESOURCES** folder.
- The resources are divided into 6 categories: Precompositions, Images, Videos, Audios, Solids, and Sources. Activate the ones you want to add to your **RESOURCES** folder.
  - **Precompositions:** Every composition in your RENDER folder will have a respective precomp folder found inside PRECOMPS. If you have precomps shared between compositions, a Shared Precomps folder will be created.
  - **Images, Videos, Audios:** Add as many file extensions as you need with the + and - buttons. Files will be sorted by extension, with any unsorted files placed inside the OTHERS folder.
  - **Sources:** Extract the project files you need from a composition selection. Anything else remaining in the project will be placed inside this folder if you didn't activate 'Reduce the project'.
  - **Solids:** All solids will be gathered in this folder, eliminating scattered clutter.

### **Save Presets:**

Save your configuration as presets using the save icon button next to the Presets dropdown menu. All your presets can be found in your Documents folder. Simply look for OrganizerPro and share any of the .json files you created in After Effects.

### **Any Feedback or issue?**

Feel free to contact me anytime. I created this script because my clients and I needed it, and I'm always happy to hear from you. Your feedback could even be integrated into the next version!
