

## Installation Instructions

The easiest way to install and license QualityControl is by using the [aescrpts + aeplugins manager](#). To install a trial you can select 'Add Trial' from the 'Account' menu in the app.

You can read the full QualityControl documentation [here](#).

## Manual Installation

If you want to install QualityControl manually, here's how:

1. First, close After Effects if it's open.
2. Unzip the zip file that you've downloaded from aescrpts.
3. Copy 'QualityControl.jsxbin' to your ScriptUI Panels folder. If you're not sure where this is, don't worry — here's a handy reminder:

### macOS

/Applications/Adobe After Effects (version)/Scripts/ScriptUI Panels

### Windows

Program Files\Adobe\Adobe After Effects (version)\Support  
Files\Scripts\ScriptUI Panels

And that's it! Just reopen After Effects and launch QualityControl by clicking Window > QualityControl.jsxbin

QualityControl is designed to be docked into the After Effects interface so it won't run from the File > Scripts menu.

If you have any issues with installation, please [open a support ticket](#).
