Sees through the shadows

Overview

Fixel LightIT is a **local color correction** filter.

LightIT features **novel algorithm** that is based on **non-linear masking** to identify the shadows in the image.

LightIT applies an optimized operation for correcting the colors in the shadows regions.

The result is an image with **optimized colors** and **revealed details** in the dark regions.

All done without affecting the other tonal ranges in the image.

Fixel LightIT is **Multi CPU accelerated** and compatible with computers with **SSE4** and Up.

Panel & Sliders

- + Tonal Range** Controls the tonal range of the filter. Higher values means wider tonal range is affected (Smoother transitions).
- + Tonal Threshold** Limits the tonal range of the effect. Higher values means only darker pixels will be affected.
- + Intensity Level** Overall intensity of the effect.
- + Luminosity Mode** Preserve saturation mode.
- + Preview** Enable / Disable the effect.

Installation Guide

- + **Close** Adobe After Effects if it is running.
- + **Unzip** the file "*Fixel LightIT 2.x.xxx.zip*".
Locate the folder by type (Windows / OS X).
- + **Windows Users:**
Copy the unzipped file '*Fixel LightIT 2.x.aex*' to folder
C:\Program Files\Adobe\Adobe After Effects CS#\Support Files\Plug-ins
- + **Mac Users:**
Copy the unzipped file '*Fixel LightIT 2.x.plugin*' to folder
Applications/Adobe After Effects CS#/Plugins
- + **Fixel Algorithms Folder:**
Any previous 2.x versions should be removed from the installation folder prior to installing new version.
User is advised to create a sub folder named '*Fixel Algorithms*'.
- + **Adobe Support for Plug In's:**
 - [After Effects / Plug-ins](#)
- + **Using the filter:**
 - Launch Adobe After Effects.
 - Open After Effects Project.
 - Open Fixel Algorithms Category in the Filter Panel.
 - Double click *Fixel LightIT 2*.
- + **Having problems ?**
