

# How to install.

You can install Cloners + Effectors either using AEScripts Plugin Manager or manually.

## Using AEScripts Plugin Manager:

1. Download <https://aescrpts.com/learn/aescrpts-aeplugins-manager-app/>
2. Open and follow instructions in Plugin Manager.

## Manually:

1. Copy these files:
  - Cloners+Effectors.jsxbin
  - ClonersShapeSplit.jsxbin
  - ClonersTextSplit.jsxbin
  - clonerspluseffectors (folder)

Into this folder:

**PC:** C:\Program Files\Adobe\Adobe After Effects [version]\Support Files\Scripts\ScriptUI Panels

**Mac:** Applications/Adobe After Effects [version]/Scripts/ScriptUI Panels

*DO NOT copy the top folder called "cloners\_plus\_effectors\_v[version]", but instead the three individual files and one folder inside it as described above.*

2. Open or restart After Effects.
3. Open "preferences/Scripting & Expressions" and check "Allow scripts to write files and access network" on.
4. Open Window menu and at the bottom you should now see the three plugins.

Thank you for downloading, check out the tutorials here:
