PuppetTools 3 Setup Guide

V 1.0

GREG GUNN

How To Install

Copy **PuppetTools.jsxbin** into your **ScriptUI Panels** folder. This folder location varies with your operating system and your version of After Effects, but typically you'll find it here:

Mac

/Applications/Adobe After Effects CC 2015/Scripts/ScriptUI Panels

Windows

Program Files\Adobe\After Effects CC 2015\Scripts\ScriptUI Panels

Launching The Script

After it's installed, you'll have to restart After Effects before you can use it.

To launch the script, open After Effects and then navigate to **Windows > PuppetTools3.jsxbin**. It will be toward the bottom of the list.

PuppetTools 3 Examples

Included with the script is a project file with examples from the tutorial videos, as well as a practice rig. Use these to follow along with the tutorials or practice your rigging and character animation.

ft-toolbar_PuppetTools_Icon.png

This is an icon I designed to use with ft-toolbar, should you want to include this script as a button.

Have a question?

If you have a question about how to use the script or a suggestion for how to improve it, drop me a line in the discussion forum.
