# How to install?

Copy script "**Smart Resize 2.jsxbin**" into the following folder:

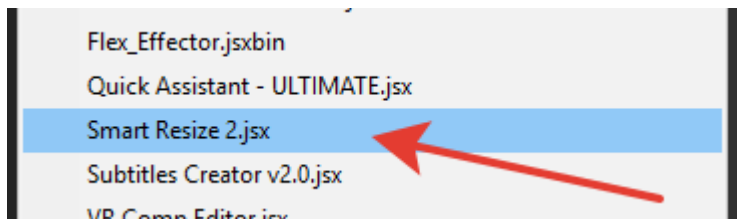

- **Windows**

C:\Program Files\Adobe\Adobe After Effects CC [VERSION]\Scripts\ScriptUI Panels

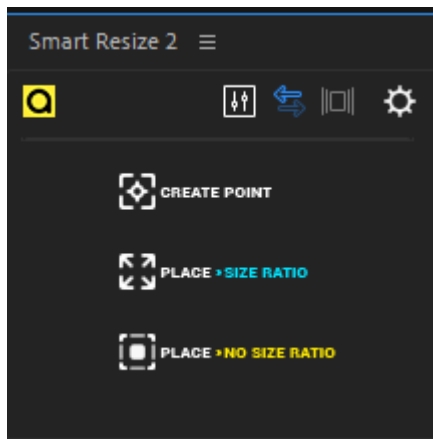

- **Mac**

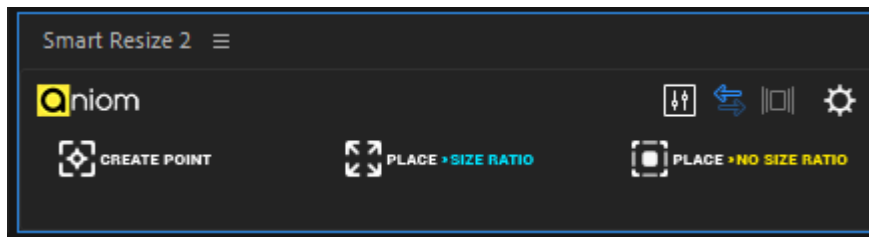

/Applications/After Effects CC[VERSION]/Scripts/ScriptUI Panels

Open After Effects, select tab Window and click on "**Smart Resize 2.jsxbin**".

It's floating panel, just put anywhere for comfort using.

## How it works?

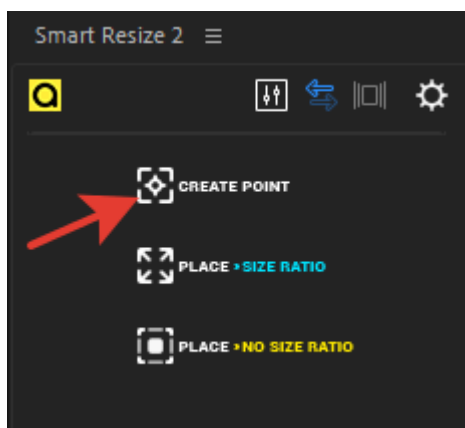

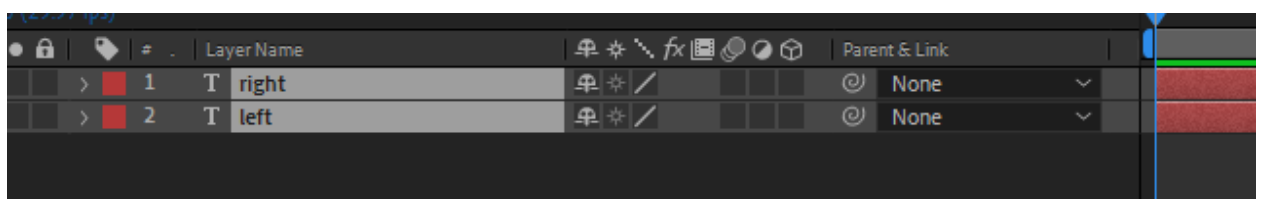

Create or set active composition.

Adjust Anchor Point (Y) on layers.

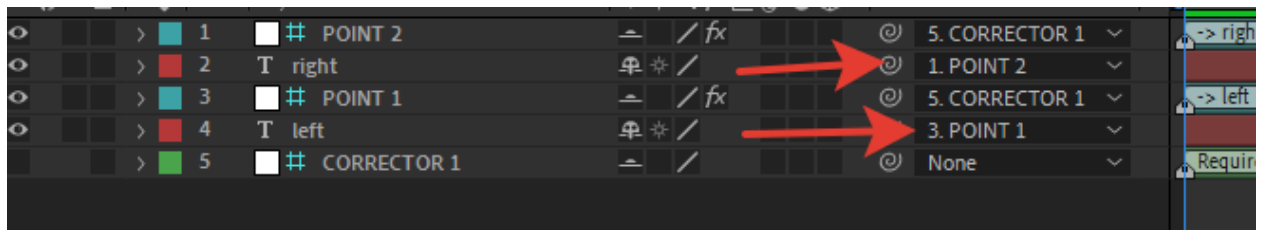

In point of anchor point will be created our pointer.

Select layer(s) and click to Create Point.

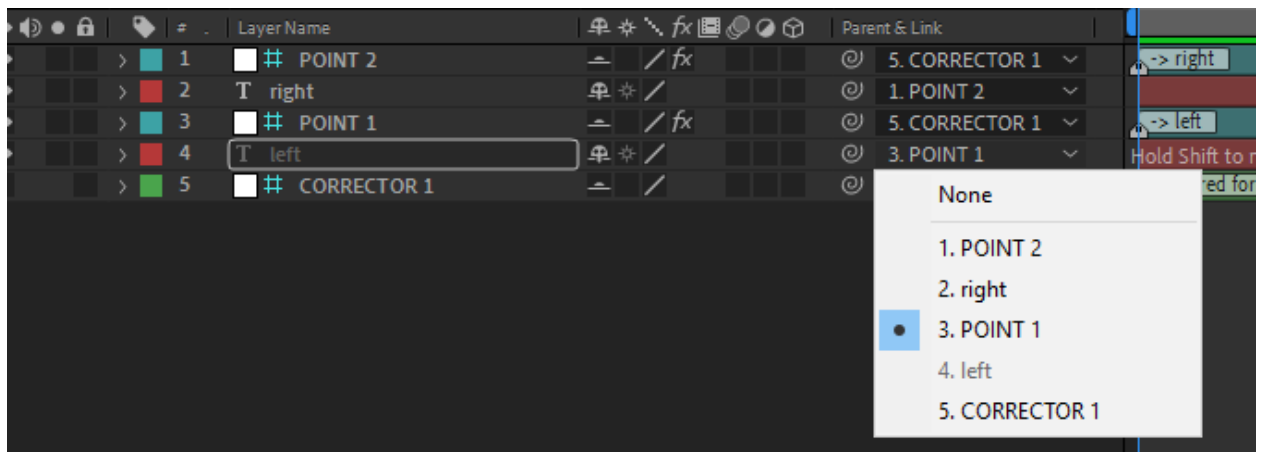

Or without selection just click to Create Point and bind layers to created pointer manually.

- **With selection layers**

Will created the new pointers and selected layers will linked to anchor point of the first layer to created group. Exactly so same for one selected layer (position of the new group = anchor point of the selected layer).

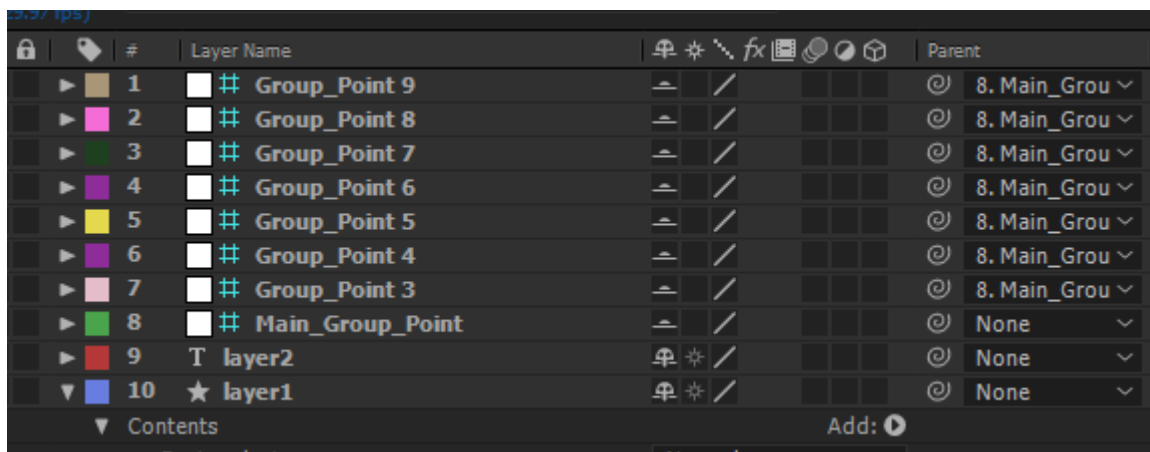

Don't touch CORRECTOR layer – required for pointers.

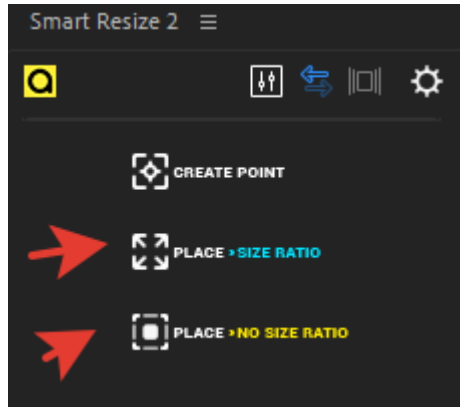

- **Without selection layers**

Will created the new pointers. Change position of new pointers (to set fulcrum) and link need layers to new pointers manually.

**!!IMPORTANT** - All pointers must be linked to the CORRECTOR layer.

Layer for backgrounds (image/video/shapes).

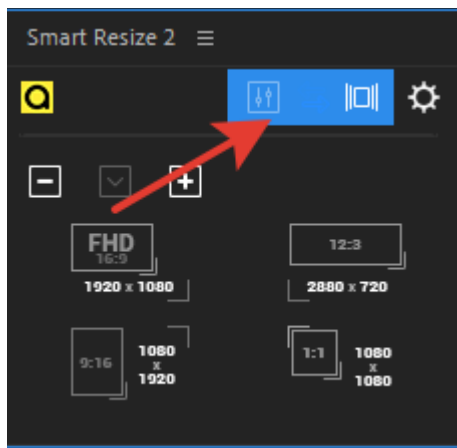

- **Place +size ratio** – for background with aspect ratio (images/video, any with aspect).
- **Place +no size ratio** – without aspect ratio (for shapes, and etc if don't need aspect ratio).

You can select layer(s) and click to create it and linked automatically or create without selection of the layers and linked your layers to created pointers manually.

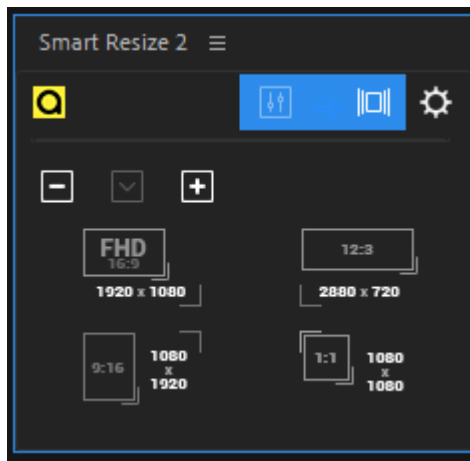

## How to preview?

In script included buttons to change size of composition.

Click on button to switch panel.

Panel switched to:

Use button – and + for variations of size (buttons).

If click to – (less)

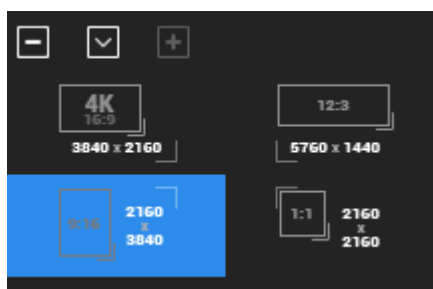

If click to + (more)

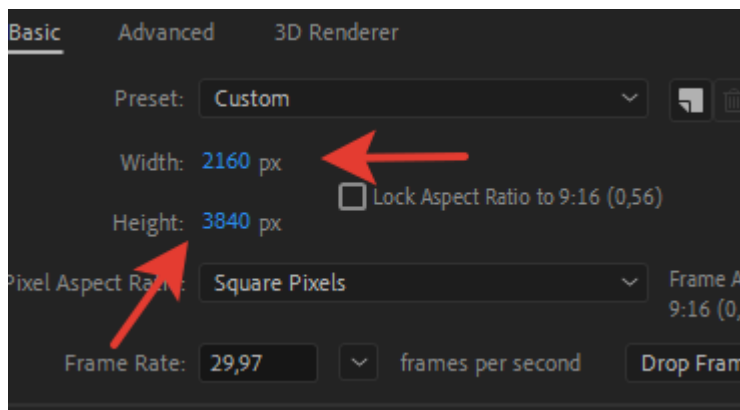

Click to the center button for default variations.

Choose size which you need and click to the button with size and aspect ratio.

If click to:

Your composition size changed to:

Use this panel to try your changes.

Good luck!
