aescripts + aeplugins
ZXP Installer

We are happy to share with the community our **FREE** installer for CEP extensions for [Adobe After Effects](#) and [Premiere Pro](#). It will work with any ZXP extension, it does not have to be one you got from us. It has a fallback custom install option that should work in cases where other installers (including Adobe's own installer) fail. So if you have been unable to install a ZXP extension on your system please give our installer a try. It has a super friendly and easy to use drag and drop on Mac and double-click on Windows.

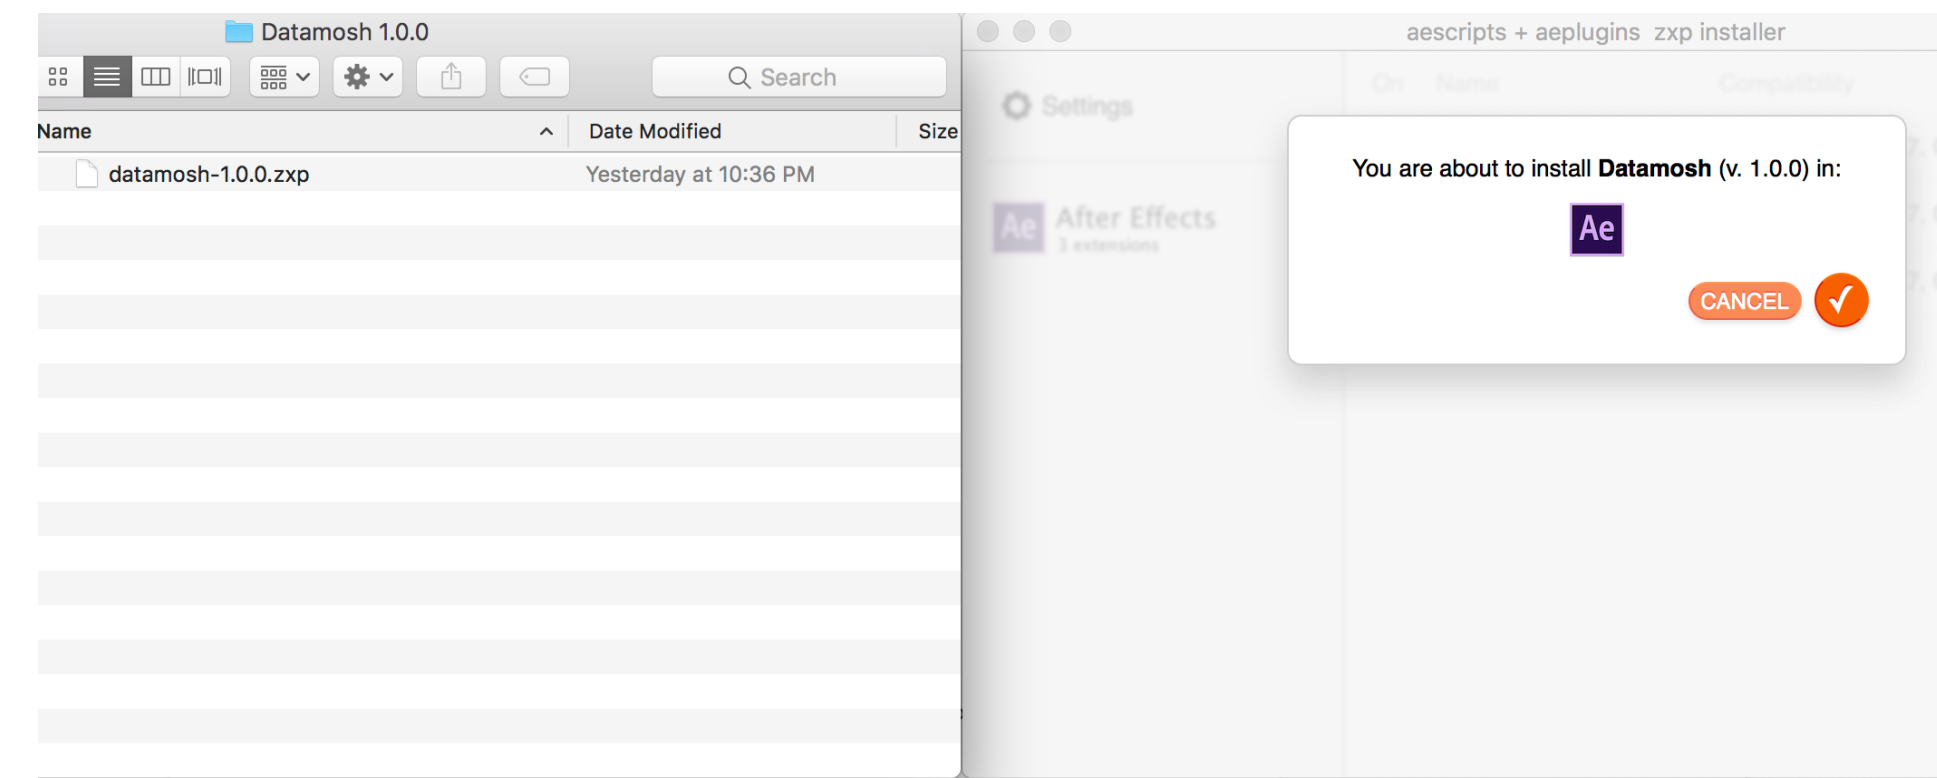

****Please note that the issue with macOS High Sierra has been fixed.** If you still have any issues, please [open a support ticket](#)

Download Mac OS X

Download Windows

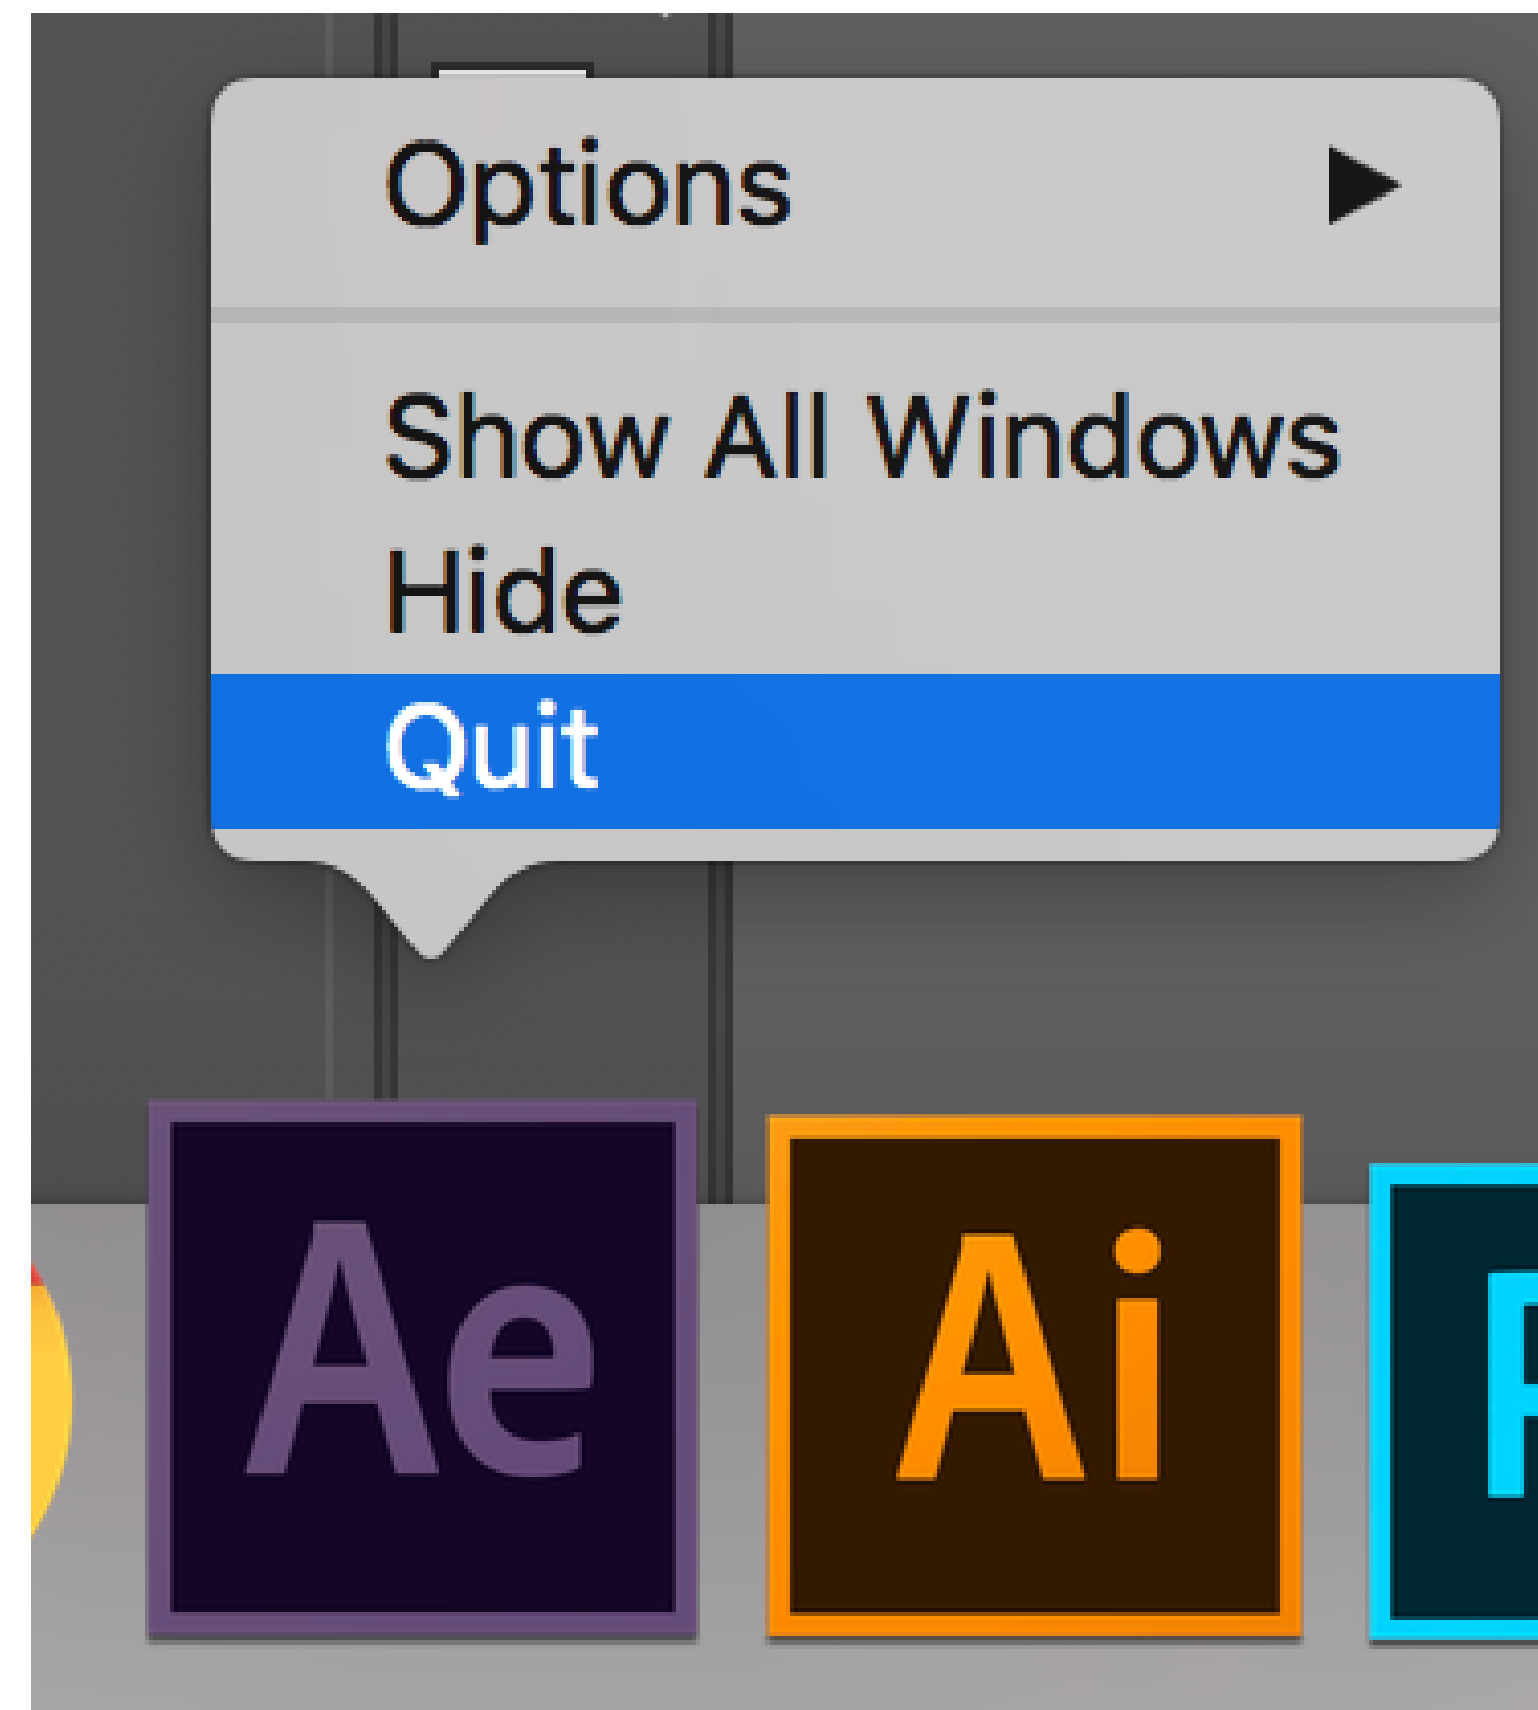

Step 2

Drag and drop the Datamosh2.zxp into the installer and follow the instructions.

Step 3

Restart After Effects.

Step 4

Open Datamosh under
Windows/Extensions
/Datamosh.
