

Installation (recommended)

aescripts + aeplugins manager

aescripts + aeplugins manager app

Download this manager app to easily manage all your aescripts + aeplugins license and updates.

Installation (alternative)

Script UI Folder

Place script here to install it in After Effects.

Points to note

After Effects

Collects instantly! However, After Effects do not have a way to cross check if the collected fonts are correct.

Use this function if you are sure that the project doesn't have any missing fonts.

After Effects x Indesign

Takes time for information to be sent across and back via Adobe Indesign.

The process takes approximately 5 - 16 secs depending on your workstation.

However, this makes use of Indesign's package system to make sure that the fonts are accurate!

Execution

After Effects

Click “Collect Font” to collect fonts straight out from After Effects.

After Effects x Indesign

Alt + Click / Option + Click “Collect Font” to collect fonts with the built-in AEID feature that utilizes Adobe Indesign to collect fonts.

****Note:** You need a valid installation of Adobe Indesign to use this feature.

Font Directory

CollectedFonts

Click “Open Directory” to find the log file and your collected fonts.

****Note:** A warning prompt will appear. This is normal and can be ignored or turned off from preferences.

About
