# Move To
## Manual

**Move To** is an after effect tool that allows you to moves layers, easily and quickly, in the timeline.

To start working with Move To, ( we recommend setting a shortcut **SHIFT+X**) all you need is to choose the layers you want to move, enter the index number of the target layer in the text field and press ok.

## Installation directories:
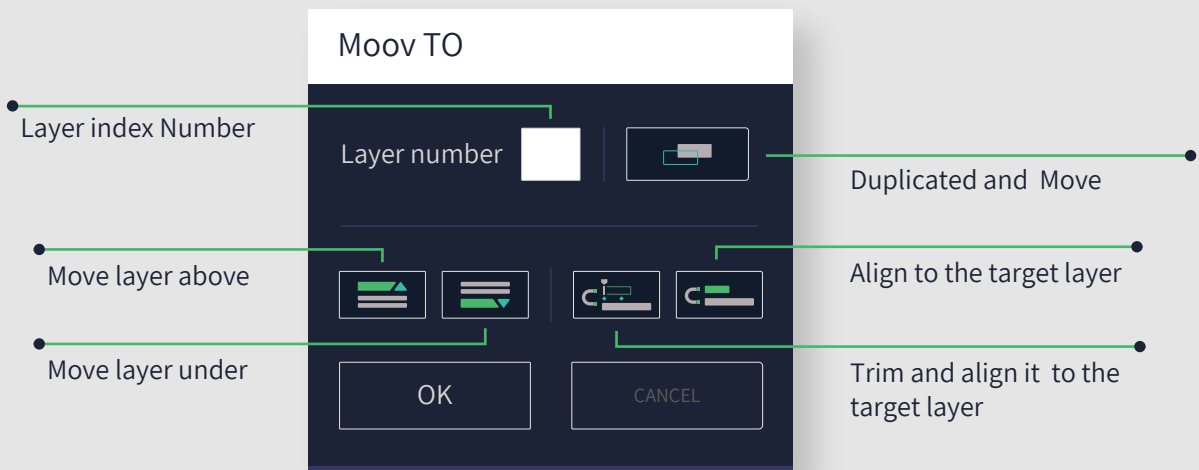

Copy the **01-move to.jsx** to the following folder:

### Windows
C:\Program Files\Adobe\Adobe After Effects <version>\Support Files\Scripts

### Mac
Applications/Adobe After Effects <version>/Scripts
