

AUTOSTEREOGRAM

for Adobe After Effects

Installation

Once you have unarchived the downloaded file, follow these steps to install the plug-in:

1. Locate the plug-in file according to your platform, and copy it to the Plug-ins folder:
 - (Mac) Copy *Autostereogram.plugin* to */path-to-ae/Plug-ins*
 - (Win) Copy *Autostereogram.aex* to */path-to-ae/Plug-ins*
2. If After Effects is already opened, close and reopen it.

Finding Autostereogram in After Effects interface

The plug-in is located in Effect > Motion Boutique > Autostereogram. You can apply it directly to the depth map layer or to any other layer.

Registration

By default the plug-in runs in trial mode (a red cross is drawn over the image). To unlock the trial, you need to register the plug-in by entering your license code in the Registration dialog.

Note that you can also use [aescrpts manager app](#) to install and license the plug-in. You can find your license code in the [My Downloads & Licenses](#) section in your user account.
