# Installation Guide

aescripts + aeplugins manager app (recommended)

The easiest and recommended way for installing SilenceRemover is to use **aescripts + aeplugins manager app.**

This software allows to automatically install and keep up to date all your aescripts tools, including Silence Remover , without having to download them manually.
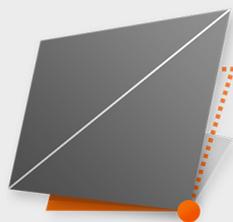

Installation on MACOS

1 - Download and **install**

**aescripts + aeplugins ZXP installer** which is available at
http://aescripts.com/learn/zxp-installer/

2 - Start *aescripts + aeplugins ZXP installer* and
drag the zxp file of BeatEdit onto the installer window
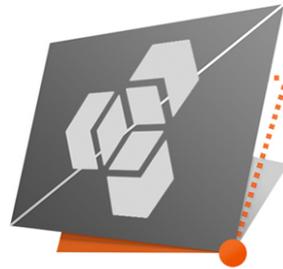

3 - Congratulations! If you now start Premiere Pro,
BeatEdit is available in the menu Window->Extensions->Silence Remover
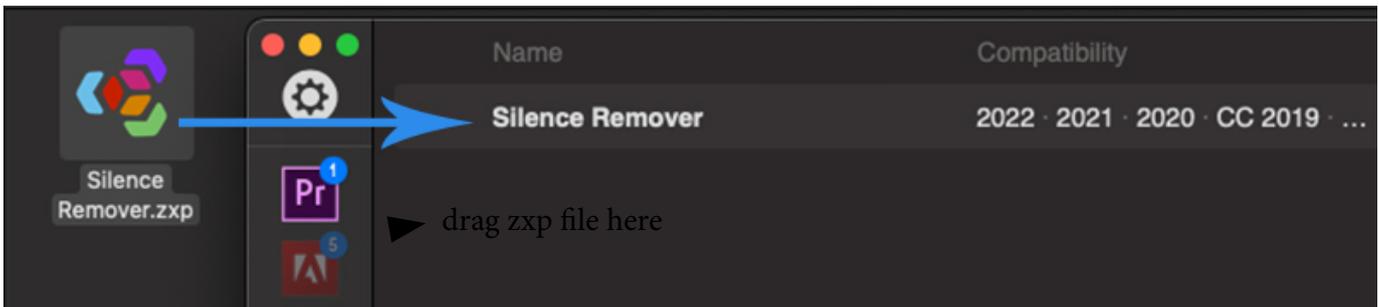

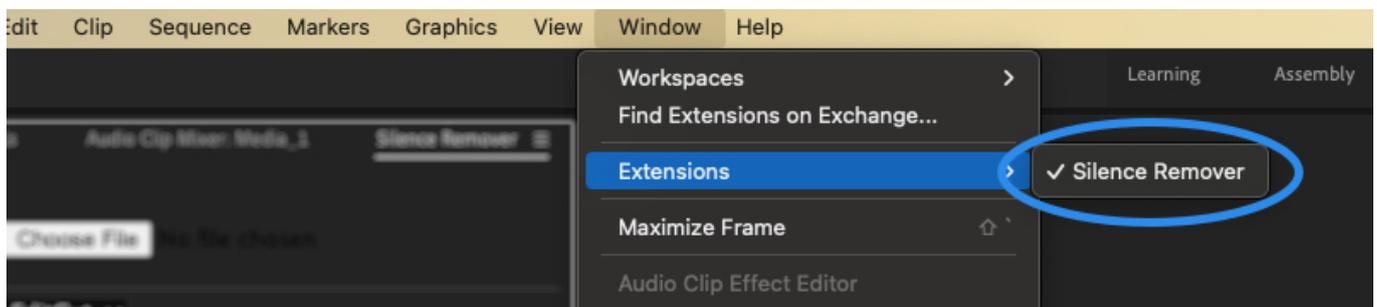

If you have any issues, don't hesitate to open a support ticket at http://aescripts.com/contact/

Installation on WINDOWS

1 - Download and **install**
aescripts + aeplugins ZXP installer which is available at
http://aescripts.com/learn/zxp-installer/

2 - Start *aescripts + aeplugins ZXP installer* and
drag the zxp file of BeatEdit onto the installer window
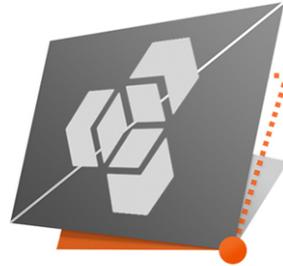

3 - Congratulations! If you now start Premiere Pro,
BeatEdit is available in the menu Window->Extensions->Silence Remover

SilenceRemover won't open ?!

If you are experiencing an issue where the extension won't open or opens with a blank window please try this solution:

- Open the aescripts + aeplugins ZXP Installer or Manager App
- Click on the gear icon to open the settings
- Click on the ZXP icon
- Make sure that "Enable Debugging" is checked for CEP 8 to 11.
- Click OK
- Retry the extension (might require restarting the host application)
